Adaptability

Mentoring & Leadership

Cross-Team Collaboration

Experience

2023/07/24 - working here

Globallogic

Role: Software Engineer

- We migrated tenants running on PHP 5 to PHP 8 by utilizing tools such as Bash, regex, and PHP. The migration involved consolidating client code into a single, unified repository for easier management.
- Delivering new features as a full stack dev.
- Conducted regular 1-on-1 meetings with team members to provide guidance, address concerns, and support professional development.
- Assisted in resolving P0 and P1 issues, ensuring prompt and effective solutions to critical problems.
- Created documentation for new features to ensure clear understanding and ease of use for the team and stakeholders.

Used: PHP5, PHP7 & PHP8, Xdebug, Bash, Regex, SQL, GIT & Github, Jira, Slack, Docker, Apache, Ubuntu & CentOS Server, JQuery, Bootstrap css
